

5th-year Masters Program

Brown's 5th-year Master's Program allows degree-seeking Brown undergraduates to pursue a master's degree in select departments in the year immediately following completion of the undergraduate degree. Eligible students must apply for admission to this program before they complete the baccalaureate degree. Admission must be approved by the department in which the master's degree is sought as well as by the Graduate School. Academic departments that participate in this program are listed below. Contact the appropriate department for more information about entrance criteria to their program.
